SUMMARY

I'm a passionate Backend Web Developer with hands-on experience building scalable and secure web applications using Node.js, Express.js, and MongoDB. I specialize in designing RESTful APIs, authentication systems, and efficient database architectures. I have developed multiple projects ranging from authentication systems and APIs to full backend solutions, focusing on clean code, performance, and maintainability. I'm highly interested in backend architecture, system design, and continuously learning modern technologies. I also enjoy improving my skills through real-world projects and exploring best practices in web development.

PROJECTS

Secure Authentication System

<https://github.com/shanawaraofficial/authentication-service>

Secure Authentication System

- Developed a complete user authentication system with Signup, Login, and Password Reset functionality
- Implemented password hashing using bcrypt for secure credential storage
- Integrated JWT (JSON Web Token) for user authentication and protected routes
- Built RESTful APIs using Node.js and Express.js
- Implemented secure password reset workflow with token-based verification
- Ensured proper validation, error handling, and user session management

Backend Ledger Management System

<https://github.com/shanawaraofficial/backend-ledger-main>

Ledger Management System

- Developed a full-stack Ledger Management System using MERN stack
- Implemented user authentication system including signup, login, and secure logout functionality
- Designed and built a RESTful API backend using Node.js and Express.js for handling user and ledger data
- Integrated MongoDB Atlas cloud database for secure and scalable data storage
- Used JWT-based authentication to protect private routes and ensure secure user sessions
- Managed environment variables using dotenv for secure configuration and deployment readiness
- Successfully deployed project to GitHub with proper version control using Git and GitHub

EXPERIENCE

Freelance Backend Developer (Self-Employed)

- Delivered backend solutions to clients via Facebook and personal network
- Developed and deployed RESTful APIs using Node.js and Express.js
- Implemented secure authentication systems (JWT & Session-based)
- Designed and managed MongoDB databases for client applications
- Customized backend features based on client requirements
- Fixed bugs and improved performance of existing projects
- Collaborated with clients to understand requirements and deliver on time
- Maintained clean, scalable, and production-ready code

TECHNICAL SKILLS

Programming Languages

HTML CSS JavaScript

Libraries & Frameworks

Express.js Mongoose NestJS

Database & Cloud

MongoDB PostgreSQL Firebase

Real-Time & Communication

Socket.IO WebSockets

Tools

Git & Github VSCode Figma

EDUCATION

 **Bachelor of Software Engineering, BSSE**
Virtual University of Pakistan
2026- 2030 Lahore, Pakistan

 **Intermediate, ICS**
Leadership Group of Colleges
2023 - 2025 Rohillanwali, Pakistan
